

OCR Demonstration Readout

Generated June 19, 2026 at 04:20 PM — each panel shows the source image alongside extracted text, verified for accuracy on handwritten and mixed print/handwriting samples.

Figure 1 — Lesion area calculations (handwritten)

Type: Handwritten math / clinical notes

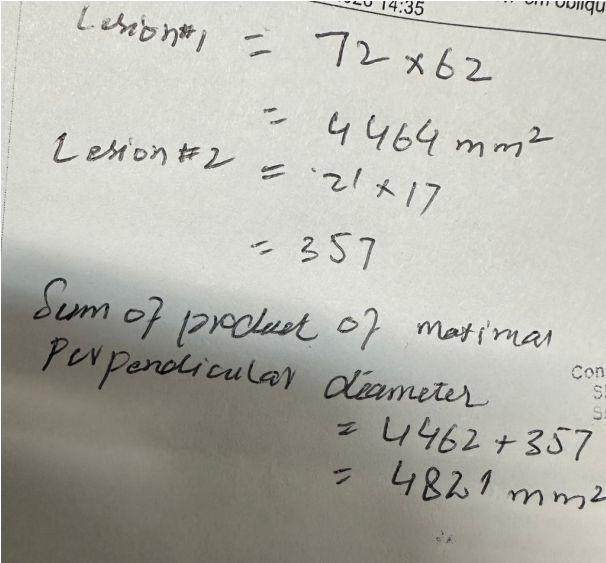

Source image	OCR readout
 A photograph of a piece of paper with handwritten calculations. The text is written in black ink. At the top, it says 'Lesion #1 = 72 x 62'. Below that, it says '= 4464 mm²'. Then, 'Lesion #2 = 21 x 17'. Below that, '= 357'. Then, 'Sum of product of maximal perpendicular diameter'. Below that, '= 4462 + 357'. Finally, '= 4821 mm²'. There is a small stamp on the right side of the paper that says 'Conv', 'SI', 'SI'.	Lesion #1 = 72 x 62 = 4464 mm² Lesion #2 = 21 x 17 = 357 Sum of product of maximal perpendicular diameter = 4464 + 357 = 4821 mm²

Figure 2 — Clinical findings table (handwritten)

Type: Handwritten grid notes

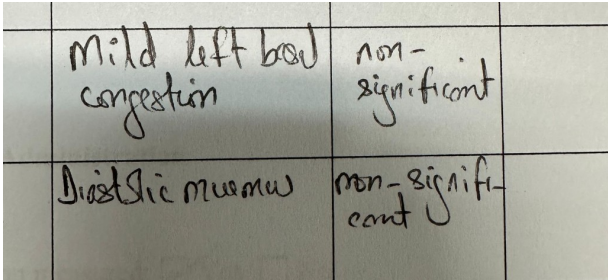

Source image	OCR readout
 A handwritten table with two rows and two columns. The first row contains 'Mild left basal congestion' and 'non-significant'. The second row contains 'Diastolic murmur' and 'non-significant'.	Mild left basal non-congestion significant Diastolic murmur non-significant

Figure 3 — Vital signs form (printed + handwritten)

Type: Mixed print / handwriting

Source image

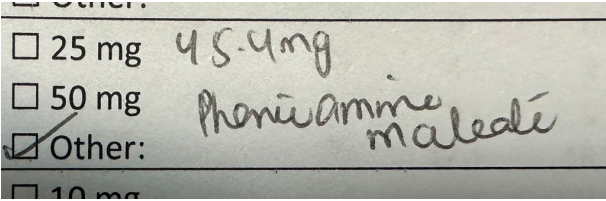

Vital Signs	Result	Unit
Systolic Blood Pressure	118	mmHg
Diastolic Blood Pressure	74	mmHg
Pulse	92	Beats/min (bpm)
Respiratory rate	19	Breaths/m
Axillary Temperature	37	°C

OCR readout

Vital Signs	Result	Unit
Systolic Blood Pressure	118	mmHg
Diastolic Blood Pressure	74	mmHg
Pulse	92	Beats/min (bpm)
Respiratory rate	19	Breaths/m
Axillary Temperature	37	°C

Figure 4 — Medication dosage form (printed + handwritten)

Type: Checkbox form + cursive handwriting

Source image	OCR readout
	[] Other: [] 25 mg 45.4mg [] 50 mg [✓] Other: Pheniramine maleate [] 10 mg
